

## How to Whitelist Dinova Email Domains

Help ensure your Dinova messages are getting through by following these simple steps.

---

A couple of times a month, we send out Dinova emails – messages that include things like Dinova restaurant updates and newsletters. We try only to message you when there’s something exciting to share – and we definitely don’t want anyone missing out.

We recently created new domain for sending Dinova emails. Your email service provider may use filters that prevent you and others in your organization (including registered myDinova users) from receiving or being able to view Dinova emails in your company email inbox.

In order to ensure that you’re staying in the loop, please add us to your list of trusted email domains and designate us as a “Safe Sender”. The new Dinova email domain is: [noreply@dinovamarketplace.com](mailto:noreply@dinovamarketplace.com).

To add Dinova to your address book:

1. Copy the address [noreply@dinovamarketplace.com](mailto:noreply@dinovamarketplace.com)
2. Paste the address into your email contact list

We also recommend that you contact your IT department to have Dinova added to the list of trusted domains for your organization – a process sometimes referred to as whitelisting. Please provide your IT contact or network administrator with the following domains:

- [@dinovamarketplace.com](mailto:@dinovamarketplace.com)
- [@dinova.com](mailto:@dinova.com)
- [@dinova.net](mailto:@dinova.net)
- [@mydinova.com](mailto:@mydinova.com)

Thanks for helping out. We want to stay in touch!
